

41st Polish Seminar on Positron Annihilation

9-13 September 2013, Lublin, Poland

First Announcement

It is our pleasure to invite you to participate in the 41st Polish Seminar on Positron Annihilation. The conference will be held on 9-13 September 2013 in Lublin (Poland). The purpose of PSPA-13 is to gather people interested in research related to the positrons and positronium annihilation in order to exchange ideas concerning new results and experimental or theoretical methods in this field. The conference will include invited talks along with contributed oral and poster presentations regarding the following topics:

- Theory
- Technical developments
- Metals, alloys and oxides
- Semiconductors
- Surfaces/Interfaces
- Polymers/Softmatter
- Porous materials and nanostructures
- Materials of biological and technological importance
- Positronium physics and chemistry

The conference place will be a conference center of Lublin Scientific Society, which is located in a beautiful palace near the Lublin Old Town.

We invite you, your coworkers and students to [pre-registration](#).
